

I think it is an outrage that law makers are entertaining the idea of restricting "XM Radio" to not offering the expansion in a PAID service of carrying NEWS and WEATHER.

I urge you as a consumer and tax payer to please reconsider your position and not interfere with the expansion of this wonderful service!

After all we have the "weather channel" and multiple news stations on cable and satellite television, why not on satellite radio???

NO ON HR 4026 !!!!!!!!!!!!!!!!!!!!!!!!!!!!!
